

Which SenseAnywhere datalogger do I need?

LN2	-80°C freezer Dry Ice shipment	Freezer Fridge Ambient Incubator	Oven Autoclave	Oven	High temp oven	Sensor type needed
						20-20-31 or 20-20-43 + 01-01-30 or 20-20-41 + Magnetic Door Contact Set
						20-20-43 + 01-01-00
						20-20-43 + 01-01-03 20-20-43 + 01-01-04
						20-20-43 + 01-01-02 20-20-43 + any 4-wire Pt100
		 Temp + RH				20-20-25 20-20-43 + 01-01-20
						20-20-30 (In transport packaging or room monitoring – shorter range)
		 Temp + RH				20-20-24 (Temp + RH in transport packaging or room monitoring – shorter range)

- Notes:**
- Besides the data loggers you will at least need one AccessPoint (infrastructure), depending on the area which you would like to cover multiple AccessPoints might be needed.
 - If you already have a running installation and you do not want to extend the wireless coverage you just add data loggers to your system.
 - If you need initial calibration and regular re-calibration we strongly recommend using an AssetTag for each device that needs to be calibrated. The system will keep track of the logger swapping without any downtime or administration. Keeping all history linked to the asset that is being monitored without paperwork.
