

Thermo/Cense Inc.

NEXT LEVEL INSTRUMENTATION

Signal conditioners,
alarms, power supplies
and power monitors

High-quality instrumentation
valves and fittings

Battery powered dataloggers

Precision pressure
calibrators, indicators
and digital transducers

Gas mass flow meters,
controllers, pressure controllers

Temperature sensors,
transmitters and
thermofoil heaters

SCR power controls,
distribution systems,
engineered power supplies

AC and DC current
transmitters, switches and
ground fault sensors

Pressure and temperature
gauges, transmitters
and switches

Process controllers,
thermostats, timers and
counters, indicators

Precision viscosity
measurement systems

Wireless data loggers for
continuous monitoring

Digital pressure and temperature
gauges, transmitters and alarms

Load monitors and overload
relays for AC motors,
compressors and pumps

Fixed and portable gas
detection instruments

The pioneer of modern leak
and flow testing systems

Handheld instruments and
battery powered dataloggers

Humidity and dew point
transmitters, indicators,
CO₂, and barometric
pressure sensors

ThermoCense.com

Quality Instrumentation / Friendly Service / Trusted Application Expertise

When quality products and application expertise matter, rely on Thermo/Cense. Engineers have trusted us since 1970 for a comprehensive selection of instruments, controls and components used in industries ranging from pharma to HVAC to oil and gas and military/aerospace.

As a small, independent distributor, prompt, attentive service to you is our priority. Should you need a

helping hand in selecting the exact product—especially for challenging applications—our expert team can assist. Ensure the performance of your finished product and get the next-level service and support you need with the pros at Thermo/Cense.

Choose from the wide array of products and complete systems available:

Temperature

RTD, thermocouples, assemblies, sanitary sensors, transmitters, controllers, switches, explosion proof sensors, customized solutions, miniature sensors, wireless data loggers, continuous monitoring systems

Pressure

Transducers, dial gauges, digital gauges, switches, controllers, calibrators, OEM solutions, precision regulators

Flow

Meters, controllers, gas mass flow controllers, gas mixing systems, liquid flow, turnkey flow testers

Data Logging

Analog signals, digital signals & gateways, cloud-based recording, email and text alerts, battery powered loggers and validation software

Instrumentation Valves and Fittings

General instrumentation fittings and valves, medium and high pressure fittings and valves, connectors, tubing, custom fabricated assemblies, exotic materials

Relative Humidity

Handheld instruments, high accuracy, oven control solutions, room monitors, duct mounted probes, dew point monitors, calibration standards

Calibration Equipment

Pressure transfer standards, gas mass flow standards, digital pressure gauges, relative humidity standards

Signal Conditioning

AC/DC input & output, isolators, signal splitters, potentiometer & strain gauge input, transmitters

Power Control

SCR power controllers, current switches and transmitters, alarms and indicators

Power Monitoring

Power quality monitors, motor and pump protection, current switches and transmitters

HVAC

Differential pressure sensors, room air sensors, duct sensors, averaging sensors, relative humidity, temperature controllers

Indicators and Controllers

Loop controllers, thermostats, panel meters and switches, pressure and flow control

Leak Detection Systems

Turnkey leak and flow testing, custom fixturing and test systems

Gas Detection

Fixed and Portable gas detectors for combustible and toxic gases, gas detectors for refrigerants, flame detection, combustion analysis

Viscosity

Process viscometers, viscosity instruments for challenging applications
